Healthy eating

People always talk about what we should and *shouldn't* eat. But why is it important?

Fast food contains a lot of fat. This is bad for the heart so you **shouldn't** eat it every day. Fat and sugar give you energy, but you **should** do exercise if you eat a lot of them. And you **shouldn't** eat a lot of sugar because it's bad for your teeth.

Healthy food gives you protein. Meat and fish provide protein and along with cereals, they also give you energy. You **should** eat five portions of fruit and vegetables every day for vitamins, minerals and fibre. Milk, cheese and yoghurt are good for your nervous system. Finally, you **should** drink plenty of water.
